***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: The claims are allowable because the prior art fails to teach two lugs extend from the base member with the first opening located therebetween and a tube extending from one of two lugs which are extending from the base member, a slit defined in the tube, and the first torsion spring mounted to the tube as set forth in claim 1.

Regarding claim 1, Dassoulas et al. (6,009,627), hereinafter Dassoulas teaches a blade clamping device including a driving shaft having an extension extending from a distal end. The drive shaft extends from the front face of the housing portion.

Dassoulas also teaches a base member including a passage defined therethrough and the driving shaft is securely received in the passage. Dassoulas also teaches that the blade is connected to the driving shaft and a first opening defined through a side of the base member and communicating with the passage. Dassoulas also teaches a cam member pivotally connected to the base member and a first end of the cam member being a cam head which is inserted in the first opening and removably contacting the blade. Dassoulas also teaches a first torsion spring which is connected to the base member to maintain the cam head to contact the blade. Dassoulas also teaches a casing including a second opening defined in a side thereof and a lever pivotably engaged with the second opening. Dassoulas also teaches that the lever includes a handle and a pushing end. Dassoulas also teaches that the pushing end of the lever located beneath of the bar of the cam member and the cam head is pivoted away from the blade by the pushing end of the lever. However, Dassoulas fails to teach two lugs

extend from the base member with the first opening located therebetween and a tube extending from one of two lugs which are extending from the base member, a slit defined in the tube, and the first torsion spring mounted to the tube as set forth in claim 1.

The reference above by itself or in combination with the other prior art cited teach the claimed invention set forth in claim 1

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The amendments to the specification and the proposed drawings (Figs. 8 and 9) overcome the drawings objections. The purposed drawings (Figs. 8 and 9) are accepted.

Claim 2 has been canceled.
